**LIFE AFTER HATE**

Please join us for this special presentation from the co-founders of *Life After Hate*. *Life After Hate* inspires individuals to a place of compassion and forgiveness, for themselves and for all people. Created in 2011, *Life After Hate* works to counter the seeds of hate the co-founders once planted by working with individuals who wish to leave a life of hate and violence and by helping organizations (community, educational, civic, government, etc.) grappling with the causes of intolerance and racism. Through personal experience and highly unique skill sets, the co-founders of *Life After Hate* share their understanding of what draws individuals to extremist groups and, equally important, why they leave. Compassion is the opposite of judgment and *Life After Hate* understands the roles compassion and empathy play in healing individuals and communities.
